

ABSTRACT OF THE DISCLOSURE

In a radio resource allocation method of the present invention,  
use-state information of radio resources and priority information of  
mobile stations using the same radio resources of both a base station  
5 of concern and neighboring base stations is detected at the base  
station of concern. A new radio resource is allocated to a link  
between the base station of concern and a requesting mobile station  
in a cell site of the base station of concern based on the use-state  
information and the priority information of both the base station and  
10 the neighboring base stations.
